

5-15-5-5S-0.1Zn

One Pass. More Nutrition.

Flexible Early-Season Nutrition

thrYv is designed to work with today's farming practices. Easily blended with UAN and applied preplant, it supplies essential nutrients that young plants need during the critical early growth period.

PrePlant

Easily blends with UAN to add more nutrition during a preplant application.

At Plant

Apply with planter or guidance to precisely place thrYv out of furrow* as a nutrition pass.

Early Sidedress*

Provide more plant nutrition in early season for roots to utilize.

One Product. Three Application Windows.
Early-Season Nutrition Where and When You Need It.

Why Early Nutrition Matters

Before V4, corn relies on the seminal root system, for nutrient uptake, nutrient supply and anchorage until the nodal roots become the primary root system.

Research has found adequate availability of N, P, K, S, and Zn is vital for young corn plants during the spring months, when nutrients are slow to become available.

Guaranteed Analysis

5 - 15 - 5 - 5S - 0.1 Zn

Total N	5%
Total P.....	15%
Total K	5%
Total S.....	5%
Total Zn.....	0.1%

Product Weight: 10.8/#/G
Rate: 9 GPA - 30 GPA

*not to be applied in-furrow or foliar.

thrYv helps bridge the gap and supports stronger early-season growth.
